this case against msft is a farce based on jealousy not fair competition. It has cost all involved millions and the only benefit has been to posturing lawyers. It is time to stop all of this and to allow inovation and business to progress smoothly. If giving computers to schools etc can create a continuance of this farce then an amount of money to buy competitors machines should be provided. It will be interesting to see what happens to the \$\$\$ in the end they will be buying Microsoft services.
